ARTISTIC PAVER COPING & SPECIALTY PIECES

Artistic Paver's coping and specialty pieces are ideal for decorative uses such as pool coping, raised walls, steps, spillways, fountains, benches, planters, etc... This ensures that materials used for architectural solutions will coordinate with the Artistic Paver decking material.

Artistic Pavers manufacturing process creates a very strong, nonporous paver. Our coping can be used in any climate, sealed or unsealed. The high density also helps to prevent salt damage, algae and mildew growth and secondary efflorescence.

The result is a luxurious combination of beauty and technology that will keep you satisfied for many years to come.
