INTERLOCKING SAND-SET PAVERS
FOR PEDESTRIAN APPLICATIONS

ARTISTIC PAVER MFG.

STEPLOCK®

Why settle for the usual when you can have Artistic Pavers?

- **We won't crack you up, but we do make good pavers ...**

Regular poured concrete decks crack, Artistic Pavers flex between pavers avoiding cracks.

- **We are cool...**

Cool on your feet. Most of our pavers are light colored and typically much cooler than most other deck surfaces.

- **Smooth, but not too smooth...**

Our pavers are comfortable to walk on, but not too slippery, dry or wet.

- **Some exercising is fun, but exercising to clean your deck isn't ...**

That's why we manufacture our pavers to require very little maintenance. Because of additives and the high density of our pavers, algae, mildew and other yucky stuff have a difficult time growing on our product. Many natural and man made products require sealing to avoid the nasty stuff, we don't.

- **Salt pools, no problem...**

Again, because our pavers are so dense, salt water from pools that use chlorinators will not damage our decking.

- **Save your precious toes ...**

Our pavers are designed for commercial and residential pedestrian traffic. By calibrating and beveling the border of our pavers it keeps you from stubbing those precious little toes.

- **Lickety-split ...**

While you're sleeping, we're probably making pavers. Our standard pavers are usually ready for a speedy delivery. Installation is quicker than installing a concrete slab with a topping, because our pavers don't require a slab and paver installations are less affected by bad weather.

- **It is great to be special ...**

We make many different types of coping. Bullnosed on one, two, three or all four sides of the paver. By using our coping, you are able to have a spa or raised wall without having a seam going through the middle of the coping.

- **Great in cold weather...**

Our product passed the rigorous 50 cycle freeze-thaw test with no measurable weight loss or cracking.

- **We hate to call ourselves cheap, but we are very fairly priced ...**

Our pavers and coping add so much to the look of your backyard environment, are so functional, and will last so long, that you would think we cost a bunch. We don't, we are less costly than many materials that require slabs and a little more than some, but well worth it.

8" x 24" x 2-3/8" Planklock®

Architects and Landscape Designers throughout the country are trending towards a more lineal look for decks.

Planklock® 8"x24" delivers a very contemporary look in a 2-3/8" thick paver designed for pedestrian applications.

The smooth polished finish in its long and narrow design, creates a linear pattern that is stylish and sleek in appearance.

Our pavers are manufactured with natural materials and will vary in color. The variation in color and shade can enhance the natural look and beauty of the finished project.

the difference is in the details...

Raised pool beam and two-sided coping.

Steps using one-sided coping.

Raised walls & spillways; adjacent, two and three-sided coping.

Renovation coping;
3", 4" and 5" extension.

The Details.

Artistic Paver Mfg.[®] offers many options of coping and specialty pieces to provide a rich looking and durable solution.

Artistic Paver's coping and specialty pieces are ideal for architectural and decorative accents such as:

- Pool coping
- Raised walls
- Steps
- Spillways
- Fountains
- Benches
- Planters
- Remodeling Projects

This ensures that materials used for architectural solutions will coordinate with the Artistic Paver decking material. They will not only give your project a great look, but they also make installation easy, saving you time and money.

The result is a luxurious combination of beauty and technology that will keep you satisfied for many years to come.

Note: Coping will be slightly smaller than nominal size due to the processes required to manufacture them. Please refer to the actual sizes listed above for accuracy.

DISCLOSURES

- Because of color dye and natural raw materials inconsistencies, products will have color shade and texture variations.
- In Shellock® pavers, natural shells are embedded at different distances from the surface of the material, and then polished. Therefore, a small percentage of the shells are expected to come loose from the surface and edges of the tile. This occurrence will diminish over a short span of time and in no way will effect the strength of the product.
- StoneLock™ pavers are made and designed to give a more natural look. Tumblelock® pavers are made to give a more distressed look. Please expect variations in colors and some chipping and non perfect edges. These details are intended to enhance the appearance of our pavers.
- Due to the process required to manufacture, package, deliver, unpack, install and compact, small chipping can be expected.

- Pavers are calibrated to achieve a uniform thickness of approximately 1-5/8". Artistic Paver's products are manufactured in metric sizes and are rounded to the closest size equivalent in English units.
- Coping will be slightly smaller than above dimensions due to the processes required to manufacture them.
- Pavers should be installed from several pallets at a time to maintain the best color consistency.
- Colors on printed material or published on our website may vary from actual paver. Before making a decision, we recommend verifying your selection at your local Artistic Paver retailer.
- Due to the diversity in the natural aggregates used to make our pavers, the differences of aggregates in each plant and other elements beyond our control, the colors seen here may not exactly match the exact color of the paver. Before you make your decision, we recommend verifying your selection at your local Artistic Paver retailer.
